Chad,

Thank you for the information. In the event we are assigned this cost, we will authorize you to proceed and charge the daily cost per unit plus contract mark-up. We will need a document for each day that itemizes the equipment and we will use that as back up for the invoice.

Thanks,

From: Chad Kasin [mailto:CKasin@gdiving.com]

Subject: Spirit of Sacramento sub pump rate

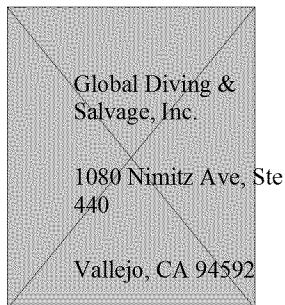

Hello Ron,

The pumps are 6" submersible pumps with an actuator float trigger capable of pumping 1200-1600 gallons per hour. There are four (4) of them on site. One in the forward hold, one in the bow-port -quarter hold, one in the midship ballast hold, and one in the stern-starboard quarter hold which communicates with the engine room. There is a 1 1/2" port with flex hose attached for discharge. They operate on 110 volt via extension cord.

The rental rate is [REDACTED] Any questions or concerns, feel free to contact me. Thank you.

Chad Kasin
